

ing (A3) Report

Topic: College Scheduler

Date: 1/28/2022

Name: Jeriel Reyes Acevedo

	PLAN
<p>variety of responsibilities during a daily basis, we may find ourselves getting n as well as finding it difficult to maintain a proper organization. This is a situation college students, given that the amount of course work and external activities tend where a lack of efficiency and time management emerges. With the wide variety must keep up with, this may have an impact in their learning process and out the semester.</p>	

	PLAN
<p>o develop a web site/app that grants a simple user interface and easy access to r will have the ability to organize a scheduler regarding college responsibilities as acurricular activity that might need a reminder. This platform is expected to be available to the public before May 2022.</p>	

	PLAN
<p>s student, often times we find ourselves having a difficult time keeping track of task needed to be accomplished.</p> <p>ourses and/or coursework tend to drive our focus away from the rest of our es, which leads to a lack of efficient time consumption.</p> <p>require a visual and organized planner where they can store any upcoming event late in order to develop properly within their courses.</p>	

4. Propose & Implement Countermeasures	
<ul style="list-style-type: none">- The app will provide a simple, yet structured section where the user can store t schedule with the adequate information such as: course name, instructor, class classroom number, etc.- A calendar section will be displayed where the user can store important upcom coursework due date or any other important activity.- A To-Do list will be available to provide the user with a direct visual reminder of prioritize in the upcoming days.	

5. Check/Evaluate	
<ul style="list-style-type: none">- The countermeasures can be evaluated by providing a success/failure counter v manually select when a task has been successfully completed before the time p The failure counter will automatically update itself if detects a late completion o give the user a better visualization of how productive he/she has been.- If poor app activity is presented, reminder/motivation messages could be imple existing task due dates get closer in order to incentivize app usage from the use	

6. Act and/or Standardize	
<p>As the user continues to improve in terms of time management and course productivity granted such as the ability to compare production from previous semesters, providing f into keep using the application for class organization.</p>
